

Based on publicly available Bigfoot Field Researchers Organization (BFRO) reports

A choropleth map of the United States showing the number of shark sightings by state. The map uses a color gradient from dark blue (low sightings) to yellow (high sightings). A legend titled "Sightings (log scale)" provides the scale with markers at 10, 30, 100, and 300. The map shows that states like California, Texas, and Florida have higher numbers of sightings (yellow/orange), while states like North Dakota and Montana have lower numbers (dark blue).

State	Approximate Number of Sightings (log scale)
California	300
Texas	100
Florida	100
North Dakota	10
Montana	10
Alaska	10
Hawaii	10
